

PROUDLY MADE IN INDIA

Automatic Car Wash Systems

The Vehicle Wash World's New Experience

The rollovers designed by **NISSAN CLEAN INDIA** will exceed all your expectations. The elegant design of the all new series sets a new trend while meeting all your automatic vehicle wash needs.

Discover all the advantages that the different Nissan Clean India rollovers offer.

Efficient Operation

Modern Design

Versatile Features

Flexible Control

Reliable Performance

Horizontal Brush Lift

Our new system features 2 separate groups of lifting motors with timer belt which gives more effective performance as compared to counterweights.

Mounted on top of the column, the lifting system is easily accessible and virtually maintenance free.

Speed and position control via brush pressure sensing system

This system allows greater control of the horizontal brush getting wash time down by optimizing the speed of displacement.

Sensors

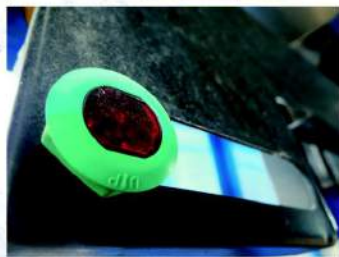

New generation sensors specially designed for use on rollovers provide greater accuracy and reliability.

Power and versatility in the dry

A quality finish is achieved with a perfect drying process. Horizontal contour following dryer nozzle design which maximizes performance by precisely following the contour of the car through close proximity.

IP66 motors

Completely Dust Proof and Water Proof High Quality make IP66 motors installed in all the roll-over machines provide a complete protection against heaviest attack of dust or water, making the machine operation seamless without any downtime due to motor failure.

Wheel Wash

Highly effective wheel wash system which washes the rims of the car by automatically detecting the wheels. The rotating brushes results in throughout cleaning of rims. Its dual action spin gives better results on new wheel rim designs.

Intuitive Control

Touch screen control panel provides a user friendly interface that makes work easier to operators at the wash facility. It is very simple to operate and can be operated by a single touch pre-feed cycle or by selecting individual cycles for specific purposes.

High Shine Active Wax & Shampoo

The high quality dosing cycle allows for a special liquid silicon wax bath in the last washing steps. It gives an incomparable shine and protects the paintwork of the vehicle from the daily attacks of elements in the air, making the car look as if it has just been washed for a longer time.

Wireless Connectivity

All over Systems come with remote wireless connectivity through wi-fi router which helps in diagnosing the faults from within office itself.

Stainless Steel Nozzles

Special High Grade Stainless Steel Nozzles with high spray volume capacity gives precise cleaning result by staying corrosion resistant.

The most brilliant generation of vehicle wash systems has arrived.

The new generation of rollovers stands out in so many ways: looks, mechanics, flexibility, and versatility. It has been created to satisfy the needs of the most demanding professionals in the wash world.

What's more, this new series has a special quality which makes it different to anything the market has ever known before: its adaptability.

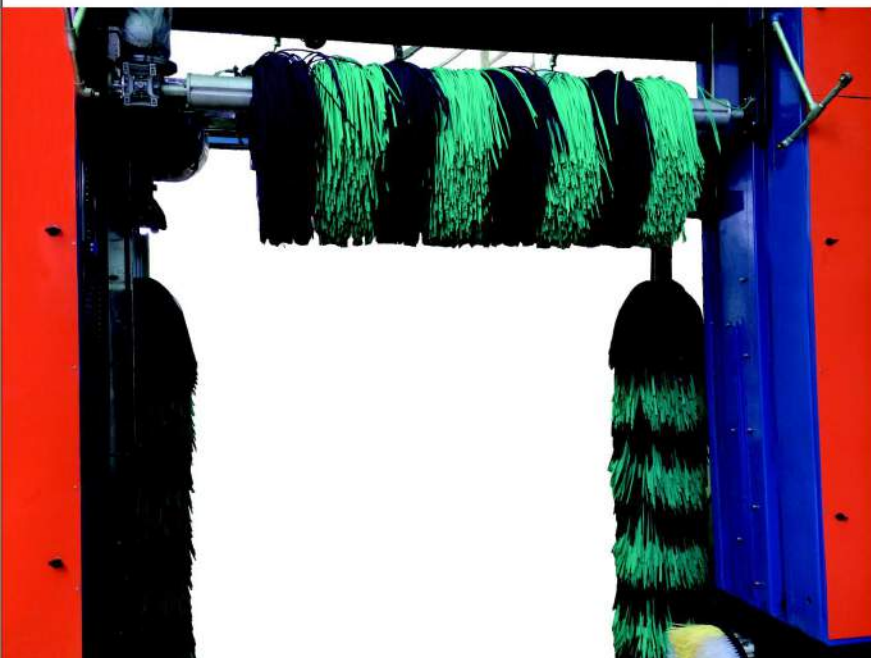

The exterior immediately appeals with its stylish modern design Aluminum Composite Panel, which combines the latest technology and maximum reliability in the wash.

WASH PTIMA

Wash Optima is our Superior Range System developed by keeping in mind the requirements of the clients who wish to have the best of the Automatic Car Wash Business.

Standard Features

- Structure made from Rust Proof Rugged Hot Dip Galvanized Sheets.
- Water Proof motors of IP 66 Protection.
- Superior Quality Soft Foam Bristle Brushes.
- On board Contour Following Blowers.
- Wheel Wash system for precise wheel cleaning.
- Liquid Foam Shampoo and Silicon Wax Systems.
- Pre-Feed One Touch Washing Cycle.
- Completely automatic operations including Pre-wash, Foaming, Scrubbing and high pressure under chassis washing cycles.
- Lesser time consumption, 10 minutes /Car, 6 Cars /Hour.
- Onboard HMI Touch Screen Control Panel.
- Contour Following Top and Vertical Brushes.
- High Quality Cable Carrier System.

WASH MASTER

Wash Master is a High Range System with all the programs which a fully fledged Automatic Car Wash System might have.

The equipment has total 5 brushes 1 Horizontal, 2 Vertical Brushes and 2 wheel wash Brushes. The Horizontal Brush follows the contour of the car and cleans the body effective. The high-tech On-Board contour following blower dries the vehicle completely and effectively within minutes. The Brushes have X profile bristles with feathered brush tips to remain gentle on the car always.

Standard Features

- High Quality Polyethylene Bristles
- Heavy Duty Structure made with Galvanized Sheets
- Contour Following Top and Vertical Brushes
- Quick Wash Cycle – complete car wash in just 10 minutes.
- Onboard Fully Automatic Contour Following Blower
- Complete Water Proof Structure with high quality make water proof IP66 motors and proximity sensors.
- VFD Controlled Drive
- Superior Quality Loop Carrier System
- Least Maintenance and User-Friendly
- Movable Gantry which completely covers the vehicle, no need to move the vehicle

WASH

Wash Champ is our latest innovation with features present in the higher end machines within a small budget range.

Standard Features

- Structure made from Rust Proof Rugged Hot Dip Galvanized Sheets.
- Lesser time consumption, 5 minutes/Car, 12 Cars/Hour.
- Water Proof motors of IP 66 Protection.
- Aluminum Composite Panel (ACP) coating on fascia for superior looks.
- Backlit Wash Cycle Display.
- Liquid Foam Shampoo.
- Horizontal Brush System with Electronic Pressure Sensing.
- High Quality Polyethylene Bristles.
- Fully Automatic PLC Control System.
- HMI Touch Screen Panel for Operation.
- Vehicle End Sensing System.
- Rust Free SS Nozzles.
- Loop Carrier System

ECO WASH is a touch-less high pressure robotic car wash system built on our top range of machine. It offers the service stations, automobile dealers, professional car was beginners and owner's a countless profit making opportunities with just using numerous types of washing cycle offered in system.

Standard Features

- External + Under Chassis Wash within just 3 minutes of time
- Suitable for all range of cars
- High Pressure Wash of up to 50 Bars
- High Operability and Reliability
- High Washing Capacity of up-to 20 cars per hours.
- Easy Installation with minimum space requirement
- Least Maintenance

Under Chassis Wash System

Cleaning the vehicles chassis has always been a big challenge and is time consuming, the lengthy time consuming process of lifting vehicles or constructing the underground pits for manual cleaning are the things of the past. With our range of Under Chassis Wash Systems you get totally safe environment for cleaning the chassis as compared to manual. It achieves up to 75% time saving.

Sliding U.C.W.

Swiveling U.C.W.

Air Drying System

Gone are the days of lengthy manual drying of your vehicles. With our Touch-Free Air Drying System, the drying of your car can be completed within a span of seconds.

The system comprises of giant and powerful Blowers. Robust housing design that does not restricts air flow, maximizing drying performance and steel impellers with backward curved blades is welded for durability

Water Recycling Plant

For those who are looking for Eco-Friendly solution and overcome water scarcity situation, we have a one stop easy to operate Water Recycling Solution. Our Water Recycling System not only helps to save water but it also helps to reduce your cost of operation by reusing water.

The Recycling Plant has highly effective Multi-Grade Filter and Activated Carbon Filter that turns the greasy and oily water clean for re-use for car wash.

Other Products

NISSAN CLEAN INDIA also provides various ranges of products for different segments of Vehicles and cleaning solutions for other Industries as well.

Some of our other products are as below

- Automatic Bus Wash Systems
- Automatic Truck Wash Systems
- Under Chassis Wash Systems For Bus
- Air Drying System For Bus
- Industrial Brushing And Cleaning Systems
